Dear Parent/Carer,

Electronic Gate Entry

To ensure the safety of pupils, we have recently installed an electronic gate system for entry to and from the main school car park. This will mean that during the school day, the car park will only be accessible via a remote entry button at the gate.

Access will only be given to parents and children who have a pre-agreed parking pass. All other visitors to the school will be required to park off site and use the pedestrian gate, which also has a remote entry button that will link through to the school reception.

The implementation of this new system has been delayed until after the Easter Holiday due to the nearby roadworks taking place.

The new safety gates will be operational from Monday 16th April 2018.

Thank you in advance for your co-operation.

Yours sincerely

Bryan Tait
Business Manager
