

KS2 Mathematics Revision

10-4-10

'10 minutes a day for 10 days'

Dear Parent/Carer

Your child has been working hard in maths and English this year. In order to help them maintain their current learning momentum, we are providing a booklet called '10-4-10' for them to complete during the Easter break.

The '10-4-10' programme asks them to spend 10 minutes a day for 10 days on mathematics, reading and GPS (grammar, punctuation and spelling) revision. They get the weekends off!

Every day there are five arithmetic questions with some longer test questions to complete, text based questions for reading practise and GPS questions. Pupils write their answers on the sheets, but may need some paper for extra working out. In order to help you support them, we have also produced an answer booklet. In this you will find the answers and in some cases some hints so that you can look through each of the sheets with your child once they have completed them.

We also want your child to have a good Easter break and enjoy themselves. They have worked so hard already this year and need to have balance between school work, their hobbies and free time.

Thank you for your continued support throughout Year 6.

Miss L Davies
Year 6 Standards Leader
