

WEEK BEGINNING:

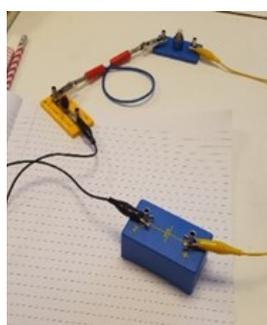

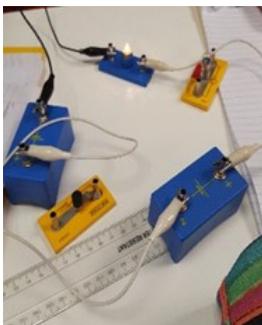

## Christingle

After all of the snow, Year 6 continued the Christmas feel with Christingle services in their classroom on Wednesday. All of the children created Christingles and learned about the meaning of the different parts that make it. The Christingle service helps to raise money for The Children's Society. Many children have brought back their collection candles with donations for The Children's Society to help children across the UK who are in trouble and cannot get out of their difficult situations. A big thank you goes to Morrison's and their Community Champion for donating the oranges for the service.

## Science

This half term, the Year 6 Science topic has been Electricity. This week, some of the classes have been investigating how to make circuits. 6DM and 6JB went over to the Science Labs to set up their circuits, whereas the other classes created them in their own classrooms. All of the pupils were very enthusiastic and many discovered how to solve problems when the bulbs did not light up or the motors did not work. Over the next few weeks, all of the pupils will be beginning a project combining Science, DT and some of their knowledge from their work about the Titanic – it should be great!

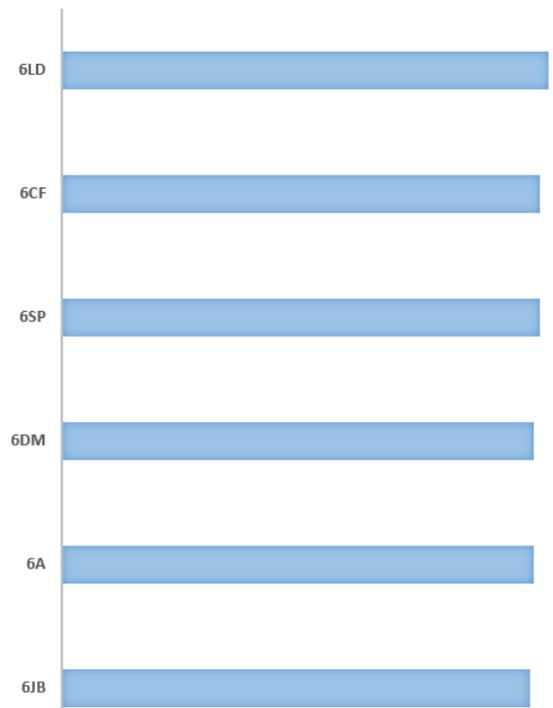

## Advent Challenge

Year 6 have been given the Advent Challenge to complete every day of advent that they are in school. From Monday, they will be challenged to complete an act of kindness that will make someone else's life better or make someone feel better about themselves. They have an orange card to log every act they have done which then will be checked by a teacher. If they manage to complete this challenge, they will receive a selection box at the end of term. Good luck Year 6.

A massive thank you to Albion Machinery for generously giving every pupil in school an amazing advent calendar!

## ATTENDANCE

WELL DONE 6LD!

IPSLEY  
READS-  
QUESTION  
OF THE  
WEEK

MUD, SWEAT AND TEARS

What  
dangerous  
things does  
he  
encounter?  
Find three!
