Dear Parent/Carer,

Year 6 Science Project

As part of the Year 6 science curriculum on electricity, pupils have been learning about circuits, how they are created and the components required to make a simple switch.

Incorporating design technology, they will now create and apply their knowledge in a practical context to make a Power Fan Boat that will further secure their understanding. Pupils will have the opportunity to bring their finished project home.

During the build, rechargeable batteries will be supplied for use in school but if your child wishes to take the boat home, please provided them with 2 x AA batteries to power their model.

Thank you,

Mr P Bishop
Primary Teacher
