

Dear Parent/Carer

### **Polar Explorer training**

The school has recently won a grant to host a Polar Explorer ambassador in school to deliver science wonder days to KS2 students. As part of this we are able to train Year 8 students to assist our Polar Explorer ambassador and KS2 staff when we deliver these wonder days.

Your child has been chosen to take part in training to become a polar ambassador for the school. Your child will receive training lesson 5 and 6 on Monday 19<sup>th</sup> November with Mrs Duggins and Dr Jenny Watson in lab 2. On Monday 26<sup>th</sup> November in one lesson your child will be assisting Dr Jenny Watson when she delivers her KS2 wonder day.

Later in the year, all classes in Year 5 and 6 will have another wonder day and your child will be assigned to a class to assist them for the duration of the day.

This is an amazing opportunity as your child will be able to get first-hand knowledge about the world of work in the Arctic Circle and have the training from a STEM ambassador as well.

During this experience your child may miss some lessons and therefore we ask that they catch up on any work missed.

Yours sincerely

Mrs H Duggins  
KS3 Science Leader (Ipsley and Arrow Vale)
